On behalf of my institution, I want to note that my institution would like to be described on [www.melioidosis.info](http://www.melioidosis.info) with **that we can support other people outside of my own institution as following.**

List of possible supports

- *B. pseudomallei* identification:
- Isolate or specimen storage:
- Research collaboration: **[Yes]**
- Biosafety guidance:
- Reporting human cases (*this will be automatically turn "yes" only after admin received the data that can be displayed on the website*)

I totally aware that cost of the support is up to the discussion from my own institution and those who seek the supports.

I want the following note to be display on the website under the list of possible supports (maximum 500 characters)

Open to discussions regarding collaborations and support that can be provided

Sincerely,

Direk Limmathurotsakul
